### **DETAILED ACTION**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of USPN 5,897,797 to Drouillard et al. AAPA describes well known marking of foodstuffs (Specification, Background of the Invention; and Information Disclosure Statement(s)). Drouillard et al disclose well known two step marking comprising ink free marking, such as laser marking, with subsequent application of food coloring. The use of the marking as described in Drouillard et al with the AAPA would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the two step marking provides a more durable mark. The subject matter set forth in the dependent claims is disclosed in the AAPA prior art documents and combinations thereof including this AAPA in view of Drouillard et al would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because automating of marking processes improves process speed and accuracy.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to multi step marking.
